1. Call main number, at main auto attendant press "#" (Or option configured for Voicemail)
2. When you hear the prompt enter your mailbox number
3. When you hear the prompt enter your password + "#"
4. Follow the voicemail menu prompts

First Time Set Up

To initially set up voicemail, press the "message" key on your phone (or dial * and ext. number if you do not have a message key), enter your password which is your extension number (default). At this point, you will be guided through the process of a first time set-up. Follow the prompts to set up your new password, name, and greetings. You should change your password when prompted to something other than your extension. If you leave your ext. number as your password, each time you access your VM box, you will hear the set up wizard again, so we *highly* recommend changing it. Also, the name that you record in the mailbox will be the same recording callers hear when they access the company directory and the find me feature.
